### Experience - Professionalism - Integrity

Information Technology is a rapidly changing field. Our team has over 30 years in the IT industry and has been at the forefront of technology and security changes. Our team members hold gold standard industry certifications and stay current with industry best practices while searching for future technologies and risks.

#### IT Risk Management & Risk Management Framework (RMF)

Not only must we worry about compliance, we must worry about risk and what we are doing to manage that risk. We are experts in the National Institute of Standards and Technology (NIST) Special Publications 800-37 and 800-53. The **Risk Management Framework** is a United States federal government policy and standards to help secure information systems (computers and networks) developed by age that risk. We are experts in the National Institute of Standards and Technology (NIST) Special Publications 800-37 and 800-53. The **Risk Management Framework** is a United States federal government policy and standards to help secure information systems (computers and networks) developed by National Institute of Standards and Technology.

#### Training

We can provide industry specific certification training to include CISSP, PMP, ITIL, and others. We can also meet with you to address specific training needs you have within IT, Cybersecurity, Risk Management or your individual specific concerns or issues and design training around those needs.

#### IT Service Management

**IT service management** (ITSM) refers to the entirety of activities – directed by policies, organized and structured in processes and supporting procedures – that are performed by an organization to design, plan, deliver, operate and control information technology (IT). Our team members are experienced in leading and managing ITSM contracts valued at \$99M.
